To Whom It May Concern:

This certifies that I have this day examined the nursery stock and premises of the Sussex Nurseries, of R.S. Johnston, at Stockley, Sussex County, Delaware, and that said nursery stock is apparently free from crown gall, peach yellows, peach rosette, the San Jose scale, and all other plant diseases and insects of a seriously dangerous nature.

This certificate may be revoked by the State Board of Agriculture for cause, and it is invalid after August 31, 1904, and does not include nursery stock not grown on the above named premises, unless such stock is covered by certificate of a state or government officer and accepted by the State Board of Agriculture.

RIFLE. Col., May 2, 1901.

Last spring I ordered some young trees of you. Every one laughed at me. "They were too chean." but when they came the laugh was mine for they were the very nicest, cleanest and healthiest looking trees ever brought here. Others who bought from agents of near by nurseries paid twice as much and lost nearly every tree, while I did not lose one, and now they are beautifully grown and the thrittlest trees I ever saw. Were not watered at all during a long drought.
